Proceedings of the 14th International Workshop on Matrices and Statistics

RLIMS: Volume 8 2005

	Foreword	iii - v	J. J. Hunter & G. P. H. Styan
	Some comments on the life and work of Jerzy K. Baksalary (1944–2005)	1 - 44	O. M. Baksalary & G. P. H. Styan
	Recollections from a 50-year random walk midst matrices, statistics and computing	45 - 52	S. R. Searle
	Antieigenvalues and antisingularvalues of a matrix and applications to problems in statistics	53 - 76	C. R. Rao
	Appoximation-assisted estimation of eigenvectors under quadratic loss	77 - 96	S. E. Ahmed
	Continuous canonical correlation analysis	97 - 103	C. M. Cuadras
	The geometry of statistical efficiency	105 - 121	K. Gustafson
	Eigenvectors of block circulant and alternating circulant matrices	123 - 142	G. J. Tee
	Leaving useful traces when working with matrices	143 - 154	K. Vehkalahti
	On a matrix with integer eigenvalues and its relation to conditional Poisson sampling	155 - 163	L. Bondesson & I. Traat
	The efficiency factorization multiplier for the Watson efficiency in partitioned linear models: Some examples and a literature review	165 - 187	K. L. Chu, J. Isotalo, S. Puntanen & G. P. H. Styan
	Hessian sufficiency for bordered Hessian	189 - 196	E. I. Im
	Convergence of alternating Markov chains	197 - 202	G. Jones & D. L. J. Alexander
	Some properties of transition matrices for chain binomial models	203 - 207	G. Jones
	Simple procedures for finding mean first passage times in Markov chains	209 - 228	J. J. Hunter

Publications

The International Organising Committee (IOC) have been exploring various publication opportunities for Proceedings of the Workshop.

At this stage the IOC do not have a commitment from a high profile Journal to publish a Special Issue of refereed papers as the Workshop Proceedings.

However the following arrangements have been put in place:

Research Letters in Information and Mathematical Sciences (RLIMS)

The Editors of RLIMS will publish a special issue of papers delivered at the Workshop. A printed

The Editors of [RLIMS](#) will publish a special issue of papers delivered at the workshop. A printed version of the special [RLIMS](#) issue will be made available to all participants and be available electronically on the web.

Note that [RLIMS](#) is a preprint series. After editing, articles are published online and can be referenced. Copyright remains with the authors. All participants will be able to submit their manuscript to a refereed journal for publication.

International Statistical Review (ISR)

The IOC have agreed to an arrangement whereby participants delivering "synthesis and review" type statistical papers will, subject to the usual refereeing process, be given strong consideration for having their manuscript published in the [International Statistical Review \(ISR\)](#). This is a review journal, and does not cater for narrowly specialized papers. Publication will be fast once the referees' reports are positive. Participants are recommended to consult the [Statement of Editorial Policy](#) from the Editors of ISR.

Technical papers

Participants presenting narrowly specialized technical papers should consider making a submission to [Linear Algebra and its Applications](#) , the [Electronic Journal of Linear Algebra](#) or an other relevant journal.
